Cut Costs, Boost Productivity, and Promote Employee Satisfaction

65%

businesses say flexible workspace options reduce costs.

85%

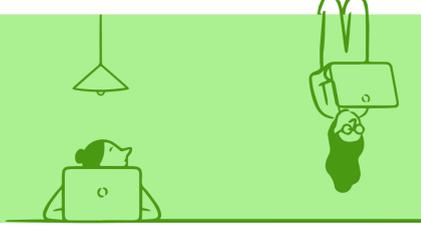

of business leaders agree greater workspace flexibility significantly boosts productivity

90%

of employees feel flexible work arrangements raise their morale

Hurdles in your IT infrastructure?

Uninterrupted collaboration is the key to getting the most out of a distributed workforce. Your employees may be scattered, but are your computing and communications systems unified?

How stable is work-from-home connectivity?

Is your Endpoint OS device-agnostic?

Can you trust private/home Wi-Fi networks with confidential company data?

What about sharing large files and holding multimedia-rich video conferences?

Is there a single OS with unified communications platform integrated to overcome all these challenges?

The answer is **yes!**

Citrix - IGEL OS with the unified high-performance OS communications platform

The Citrix Workspace App with IGEL OS: The Unified High-Performance OS with Communication Platform.

A distributed cloud-based environment with Virtual Desktop Infrastructure (VDI) powered by IGEL OS

	Unified endpoint management and control solution The Universal Management Suite (UMS) is the simple, smart, and secure management and control software that lets IT manage IGEL OS-powered endpoints from a single console.
	Built-in enterprise-level security Monitor every desktop in real-time and automatically push security updates
	Ensure end-to-end integrity With a read-only, modular Linux-based OS on each endpoint that features an end-to-end "chain of trust" from device boot to cloud workspace execution
	Hardware and device agnostic Leverage existing hardware by migrating both storage and computational ability to cloud while keeping your existing endpoints
	Latest IGEL OS Optimized for popular unified communications tools such as Microsoft Teams and Zoom as a Citrix App client - first in its class
	Split multimedia processing 'Offload' much of the multimedia processing to the Linux based IGEL OS while locally running critical real-time communications components

Value for clients

Seamlessly connect your workforce to cloud, communication tools, apps, desktops, files and microapps

Crystal clear voice, video, and webcam experience

The Citrix Workspace App and IGEL OS deliver robust performance for collaboration using a variety of unified communications platforms.

No additional IT expenditure

Citrix Workspace and IGEL OS are hardware agnostic so you can deploy on existing hardware to take full advantage of the latest features.

Customizable with modular configuration

Customize desktops with corporate branding, screensavers that deliver organizational messages and much more. Turn off unused features to improve performance.

Empower your distributed workforce to effectively connect, communicate, and collaborate with Citrix Workspace and IGEL OS.
